Doing new stuff

Serendipity

But it's software

EASY to have great ideas

Harder to refine & sustain

could this actually pay my way?
and would I want it to?

approaches from bands,
art-schools and magazines

compliments from friends and colleagues

...other ways to discuss and express it

Feeling **liberated** to write about it

Various blogs

...**thinking** about how I feel about stuff

What impact is it going to have on my future

Quite how deep have I put my foot in politically

It's just viewed skewed

But there is not much wrong with the thing itself

Because I've not engaged with it sufficiently

But has become a bad idea over time?

Started as a nice quick simple idea

Prod

and it's successes and failiures

Work responsibilities

So.... engage with that then?

What was it for anyway?
SUPPORTING PROGRAMMES

Communication Engagement FAIL FAIL
